Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1. (Currently amended) A composition useful for reducing the concentration of mercaptans in hydrocarbons comprising:
 - (A) a first component having the general formula:

wherein: (i) R_1 , R_2 , and R_3 are independently saturated or unsaturated alkyl groups, and (ii) at least two of R_1 , R_2 , and R_3 include a chain of at least two carbon atoms bonded to the two N atoms; and

- (B) a second component comprising a nucleophilic acceptor; and
- (C) a sour hydrocarbon,

wherein components A and B are admixed with the sour hydrocarbon.

- 2. (Original): The composition of Claim 1 wherein the first component is selected from the group consisting of: 1,4-diazabicyclo(2.2.2)octane; 1,8-diazabicyclo(5.4.0)undec-7-ene; 1,5-diazabicyclo(4.3.0)non-5-ene; and mixtures thereof.
- 3. (Currently Amended) The composition of Claim 2 wherein the first component is 1,4-diazabicyclo(2.2.2)octane[.]
- 4. (Original): The composition of Claim 1 wherein the second component comprising a nucleophilic acceptor is selected from the group consisting of: isocyanates, isothiocyanates, activated esters, acid chlorides, sulfonyl chlorides, activated sulfonamides, activated heterocycles, activated heteroaryls, chloroformates,

- cyanoformates, thioesters, phosphoryl chlorides, phosphoramidates, epoxides, aromatic halides, alkyl halides, imidates, and lactones and mixtures thereof.
- 5. (Original): The composition of Claim 4 wherein the second component comprising a nucleophilic acceptor is selected from the group consisting of: epoxides, aromatic halides, alkyl halides, and mixtures thereof.
- 6. (Original): The composition of Claim 5 wherein the second component comprising a nucleophilic acceptor is an epoxide.
- 7. (Original): The composition of Claim 6 wherein the second component comprising a nucleophilic acceptor is 1,2-epoxyhexadecane.
- 8. (Original): The composition of Claim 1 wherein component (A) and component (B) are in a molar ratio of from about 1:99 to about 99:1.
- 9. (Original): The composition of Claim 8 wherein component (A) and component (B) are in a molar ratio of from about 1:1 to about 1:10.
- 10. (Original): The composition of Claim 9 wherein component (A) and component (B) are in a molar ratio of about 1:5.
- 11. (Original): The composition of Claim 1 additionally comprising a solvent.
- 12. (Original): The composition of Claim 11 wherein the solvent is an aromatic solvent.
- 13. (Original): The composition of Claim 11 wherein the solvent is an aromatic solvent is xylene.
- 14. (Original): The composition of Claim 11 additionally comprising an alcohol.
- 15. (Original): The composition of Claim 14 wherein the alcohol is dipropylene glycol.

- 16. (Original): A method of reducing the concentration of mercaptans in a hydrocarbon comprising admixing a composition of Claim 1 with a hydrocarbon having a first concentration of mercaptans greater than 0 under reaction conditions sufficient to produce a hydrocarbon having a second concentration of mercaptans that is less than the first concentration of mercaptans.
- 17. (Original): The method of Claim 16 wherein the composition of Claim 1 is present at a concentration of from about 10 to about 1000 parts per million (ppm).
- 18. (Original): The method of Claim 17 wherein the composition of Claim 1 is present at a concentration of from about 100 to about 900ppm.
- 19. (Original): The method of Claim 17 wherein the composition of Claim 1 is present at a concentration of from about 100 to about 200ppm.
- 20. (Original): The method of Claim 16 wherein the composition of Claim 1 is admixed with the hydrocarbon using an in-line mixer.
- 21. (Original): The method of Claim 16 wherein the composition of Claim 1 is admixed during shipping.
- 22. (Original): The method of Claim 16 additionally comprising the steps of determining the hydrogen sulfide content of the hydrocarbon and using a hydrogen sulfide scavenger to reduce the level of hydrogen sulfide before admixing the hydrocarbon with the composition of Claim 1.
- 23. (Original): A hydrocarbon having a reduced concentration of mercaptans comprising a the product of admixing a composition of Claim 1 with a hydrocarbon having a first concentration of mercaptans greater than 0 under reaction conditions sufficient to produce a hydrocarbon having a second concentration of mercaptans that is less than the first concentration of mercaptans.
- 24. (Original): The hydrocarbon of Claim 23 wherein the hydrocarbon is a fuel oil.

| 25. | (Original): | The | hydrocarbon | of | Claim | 24 | wherein | the | hydrocarbon | is | а | residual | fuel | oil. |
